GB 210 Stage V	Petrol 5,5 HP / 4 kW

Even in tiny gardens and small plots there could be strenuous works: exactly there get in the game our Motor Hoes series starting from the model S450, the entry level of BARBIERI range. Light, handy and in the same time with a strong framework, that allows the machine to operate in semi-challenging situations such as flower bed adjustments or move the soil already worked. Peculiarities of S450 are ease of use, transport and storage.
